Detailed Action

Paper Entry

Applicant's Preliminary Amendment A, filed on February 15, 2002 as Paper no. 2 is acknowledged.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 25, 26, 27, 47, 48, 67 and 68, drawn to an extensive group of compounds having a general formula II, as described in claim 25, pharmaceutical compositions comprising such derivatives, and methods of using them classified in class 560+, subclass 8+.
- II. Claims 28, 29, 30, 49, 50, 69 and 70, drawn to an extensive series of compounds, having a general formula III as described in claim 28, pharmaceutical compositions comprising such compounds and methods of using the same, classified in class 562+, subclass 400+.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions because each series of compounds have a different chemical structure, belong to different classifications and are even claim to be used in independent compositions.

Art Unit: 1625

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- In group I, the variable group X is defined as amino, ether, sulfide, sulfoxide or sulfone. Each of these families of compounds constitutes distinct specie.
- In group II, the variable group B is defined as hydrogen, acylamino, acyloxy, alkanyl, alkoxycarbonyl, alkoxy, alkylamino, alkylcarboxylamino, carbalkoxy, carboxyl, cyano, halo, hydroxy, thiol, sulfoxide or sulfone. Each of these families of compounds constitutes distinct specie.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

CONCLUSION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hector M Reyes whose telephone number is 703-605-1153. The examiner can normally be reached on M-F (9:00 AM-5:30 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Rotman, can be reached on (703) 308-4698. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4556. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.
